

CCYC Sunscreen Authorization

Child's Name: _____

Name of Sunscreen: _____

Expiration Date of Sunscreen: _____

Time to be given: Before outside play when UV Index is 3-5 and there is no shade available, or before outside play if UV index is 6 or higher regardless of if there is shade or not.

All sunscreen must be in original packaging, complete with intact label, and labeled with the child's first and last name. This authorization is valid until the sunscreen's expiration date, or the product is used to its entirety. Application of the sunscreen will be recorded in the ProCare app daily. If the UV index is low, or weather prevents us from being outside, that will be recorded in the app as well.

I authorize Creative Center for Young Children staff to administer this sunscreen to my child.
